AMENDMENTS TO THE SPECIFICATION

Please replace Paragraph [00109] with the following paragraph rewritten in amendment format:

[00109]   The Generation module 20 performs the sizing of the generation LRUs and relies upon data extracted from the Loads module 18 and the Architecture module 16. The Loads module 18 dictates the required AC and DC load capacities and the Architecture module 16 specifies the ~~quantities~~ number of the various LRUs. The screens associated with the Generation module 20 will be discussed in connection with Figures 20-28.
